

This Moodle activity module allows teachers to upload a PDF form and students to download an individual version that is automatically filled with their personal data (from moodle profile).

Features

- Teachers upload a PDF template with form fields (important: saved with extended editing enabled for Adobe Acrobat Reader)
- Students click the activity and instantly download their personalized PDFs
- The following fields in the pdf file will be filled from the data available in the moodle profile:
 - **full_name** = Full Name (combination of first name followed by last name from moodle profile)
 - **n_date** = Date (current moodle server date)
 - **email_address** = Email (as stated in the moodle profile)
 - **student_id** = Student ID from the username (if user name is 12345@students it will be 12345)
